TAFT WANTS NO PRIMARIES

PREFERS OLD METHODS OF SELECTING STANDARD BEARER OF PARTY.

Washington, March 8.—Senator Jos-

eph M. Dixon issued another challenge from the Roosevelt National headquarters tonight to Director McKinley of the National Taft bureau on the subject of presidential primaries. Replying to Mr. McKinley's letters of last night, Senator Dixon characterizes it as a "flat refusal to aid in getting presidential preference primaries and he makes a new demand upon the Taft managers.

In his reply to Chairman Dixon last night Director McKinley said he was in "absolute accord with the selection of delegates to the National convention by the primary system wherever primaries are or may be legally provided, fairly conducted and surrounded by restrictions of law."

Senator Dixon's letter sent to Mr. McKinley tonight says he is forced to the conclusion that "in refusing to join with me in an effort to secure an expression by republican voters as to the candidate they want you are announcing a decision of your chief, and that Mr. Taft refuses to trust the voters to determine the question of his candidacy and is willing to become a candidate of his party even against the wishes of the majority of his party."

Mr. Dixon expresses regret that Mr. McKinley referred to changes in the rule "while the game is in progress."

"I regret that you regard the selection of a republican candidate for president as 'game,' the letter says. 'Evidently you lack comprehension of the dignity with which the people invest the presidency of the United States so to designate a function which is preliminary to the election to that high office, Col. Roosevelt, is hardly necessary to say, is engaged in no 'game.' But if you insist on designating it a 'game' my desire is to eliminate marked cards and loaded dice. Mr. Roosevelt and his supporters will not tolerate the tricks and deceptions and frauds which are inseparable from the kind of politics your characterization implies."

Col. Roosevelt's manager says in his letter that through political manipulation, particularly in the South, there has been an absolute stifling of expression on the part of republican voters and submits the following to Mr. McKinley.

"I now ask you specifically:

"1. Are you willing to join me in an appeal to the republican state committees to provide for an expression by republican voters on the choice of the republican presidential candidate?"

"2. Will you immediately join with me in a telegram to the republican members of the legislatures in Massachusetts, Maryland and Michigan, which are now in session, where preference bills are pending, and where, it is reported, your friends are trying to defeat their passage, urging them to support these measures?"

"I await your immediate answer to these two propositions, because I regard action favorable to the view I take as absolutely essential to party success in November. Trust the republican voters now."

First Methodist Church.

Services at the First Methodist church tomorrow will be as follows:

Sunday school at 9:45 a. m. Preaching at 11 a. m., subject: The Rock Upon Which the Church of Christ is Founded.

Memorial services at 3 p. m., in honor of Mrs. Susie Horton.

Intermediate League at 6:30 p. m. Preaching at 7:30 p. m.

The general public is cordially invited to attend all these services. Special music has been prepared by the choir, and we promise all who come helpful service. The pastors of the city and the members of all denominations are specially invited to attend the Memorial Services in the afternoon. These services were to have been held two weeks ago, but had to be postponed on account of the inclemency of the weather.

THE DAY IN DISTRICT COURT

The trial of Houghton and Price, charged with grand larceny in connection with the Weleeka burglary cases, resulted in an acquittal. However, O. L. Harmon and Ed Wilder connected with the same case did not fare so well, they being found guilty and given a year and one day each. G. E. Sulligeralso under arrest in connection with same case is on trial. The case will likely go to the jury early this afternoon and a verdict may be rendered before night.

In yesterday's issue of the News it was stated that Sam Wade was allowed to enter a plea of guilty to assault and was given a fine of \$100. It should have been stated that the plea of guilty was to assault with intent to rape.

MANY MURDERS, BUT FEW ARE PUNISHED

The annual report of New York's Police Commissioner shows that during 1911, 148 murders were committed in that city, but only thirteen murderers were convicted—and not one executed. For the three preceding years the annual average was 117 murders and twenty-five convictions. For the same three years the annual average in the metropolitan police district of London, containing a population of about 7,000,000, was twenty murders, while fifteen murderers were convicted or committed suicide.

Why does New York, in proportion to population, have nearly eight times as many murders as London? Principally, we believe, because murder involves less risk in New York than in London, where, three times out of four, the murderer suffers death or long imprisonment, and the punishment very swiftly follows the crime.

Responsibility for this scandalous American condition rests, first of all, upon the courts. They, quite as much as the legislatures, have made the administration of justice a protracted game in which any criminal with a capable lawyer stands a fine sport-chance to win. When we can hand even one murderer out of three over to punishment within a year after the commission of the crime our murder rate will begin to fall.—Saturday Evening Post.

No Assays by Geological Survey.

Attention is called by the United States Geological Survey to the fact that it does not make analyses or assays of ores or metals for the public. Many specimens and samples are received by the survey, accompanied by requests for such treatment, with which it is impossible to comply. The most that can be done in such cases is for the Survey geologist to give an offhand opinion based on a simple examination of the specimen, but if an assay is desired, the proper course is to employ a private assayer or to send specimen to one of the government assay offices, where a regular charge is made for such work. When specimens are sent to the survey for examination, applicants should be particular to state whether they wish

them returned, as otherwise they will be destroyed. Government assay offices are located at Carson, Nev.; Seattle, Wash.; Boise, Idaho; Helena, Mont.; Deadwood, S. Dak.; Salt Lake City, Utah; and Charlotte, N. C.

OSLER RIGHT; YOUTH SUCCEEDS AGE

Gray Hair is First Sign of Age.
Harmless Remedy Restores to Natural Color.

Osler isn't the only man who turns down old age. In the business world the "young man" is always the one who picks the plums. It is an age of "new thought," "new talent," etc., and the old man is passed by in the race.

One of the first signs of coming age is the appearance of gray hairs. When you see them, act promptly. Wyeth's Sage and Sulphur Hair Remedy will correct this sign, which so often deceives people into thinking that age is really upon them. It is a well-known fact that Sage and Sulphur will darken the hair. Wyeth's Sage and Sulphur combines these old time remedies with other agents, which remove dandruff and promote the growth of the hair.

The manufacturers of this remedy authorize the druggists to sell it under guarantee that the money will be refunded if it fails to do exactly as represented.

Don't look old before your time. Get a bottle of Wyeth's Sage and Sulphur today, and see what an improvement it will make in the appearance of your hair.

This preparation is offered to the public at fifty cents a bottle. Special Agents, Gwin & Mays Drug Co.

Meningitis on General Wane.

Oklahoma City, Mar. 9.—Eight cases of cerebro-spinal meningitis and two deaths from the disease were reported at the office of the state department of health Friday. There were no additional cases in Oklahoma City, and Gladys Reinert, the 8-year-old child who was stricken Thursday morning will recover.

Three of the cases and one death were reported from Pittsburg county; one new case developed and one death occurred in Caddo county, there were two cases in Pottawatomie county and one each in Washington and Comanche. The disease made its first appearance in Washington and Caddo counties Friday.

It is a noticeable fact that the death rate has decreased wonderfully since the supply of serum was so arranged that it could be sent to any point in the state quickly. Instead of running as high as 75 and 80 percent, those counties where it was possible to use prompt measures show a death rate of 33 1-3 percent or lower.

GREAT EMPEROR'S PET NAME

In Home Circle German War Lord Permits Himself to Be Known as "Willy."

In the Woman's Home Companion there is an intimate personal story of Emperor William's only daughter, Victoria Luise, in which many new facts are brought out about the emperor and empress of Germany. Following is a brief extract:

"The emperor, in absence of his consort, speaks of her as 'my wife,' the empress in the home circle addresses him as 'Willy.' The former alludes to his family, from the crown prince to the princess, as 'my young ones,' the latter speaks of them not by title, but as 'my children,' both expressions so clearly conveying the close existing attachment.

"Very often the emperor gives evidence at unexpected moments of the ever-present thought with him of his family. At times, when they were small children, and he was being entertained at state banquets as the guest of princes or cities, he would slip bonbons into his pocket, quietly saying, 'These are for the young ones; something brought home always tastes better; I know that from experience.'

"It is told of the emperor that in Rome, when he was selecting a gown to take home as a present to the empress, a relative advised as choice an elaborate creation, mainly of lace. 'Impossible!' he answered. 'With the children constantly clambering over her, it would soon be in ribbons.'

DEEPEST DEPTHS OF POVERTY

Section in Italian Capital That Might Challenge Comparison With Any World City.

The problem of life among the poor of Rome, Italy, has been illustrated by Prof. Domenico Oranò, who recently wrote a book dealing with the miserable condition of the inhabitants of the Testaccio quarter, the most densely populated district of Rome.

Out of the 10,000 inhabitants of this quarter, scattered in 82 tenement houses, there are 723 families who cannot afford to rent apartments but are forced to sublet enough space in rooms where they can sleep. There are 513 single-room apartments in the quarter and 109 rooms are occupied by five persons each, 76 by 6, 25 by 8, while the rest afford shelter to from 10 to 15 people. The rent for sleeping space in each room varies from \$1 to \$5 a month.

The hygienic conditions of the tenement houses in Testaccio are very bad. As a rule the poor people of Rome live on vegetable soup with paste and bread, as they cannot afford to eat either meat or fish, but to make up for their scanty diet they drink wine freely. There are 38 wine shops in the quarter against only three shops where milk is sold, and the average daily consumption of wine is over 3,170 gallons for 10,000 people, including women and children.

Society's Latest Fad.

If the reports current in Paris salons are to be credited leaders of fashion will shortly startle their humbler sisters by appearing with feet and ankles bare. The ladies declare that in the name of hygiene and beauty all their followers should discard shoes and stockings as all seekers of good health forbid the corset. It is said delicate white satin anklets will be allowed and the toes of the fair wearers will nestle under borders of bright hued woolen flowers. The same flowers will climb like creepers around the bare ankles.

This new fashion craze will also lead, it is anticipated, to devoted swains imprinting a chaste salute on the ladies' feet instead of on their hands, and in view of such a proceeding taking place already some noted beauties are practicing exercises to render their knees supple.—Exchange.

Curran and the Irish Chief Justice.

Lord Norbury held his post as Irish chief justice, in defiance of hints that he should resign, until he was 87. When he was 88 it was suggested to him very strongly by the Lord Lieutenant that he ought to go, but the negotiations were broken off by Norbury challenging the envoy to fight. His rambling and irrelevant comments often annoyed counsel. Once when he was maundering on he was interrupted by a sound which he only partially heard but which was really the braying of a donkey. "What noise was that?" he asked. "Merely an echo of the court, m'lord," replied Curran gravely.

Another judge called Fletcher, a very surly person, said to counsel, "Sir, I'll not sit here to be baited like a bear tied to the stake." "No, not tied, m'lord," was the suave interruption.—Westminster Gazette.

Talk the Fountain of Life.

A well-known doctor has recently propounded rather a curious theory. He says:

"Actresses and actors and all public speakers, lecturers, statesmen, politicians, professors—all live to a great age as a rule because they use their lungs. The average person doesn't breathe properly and does not make sufficient use of his lungs. Breathe as much as you can and talk as much as you can. That is the recipe for reaching an old age and remaining young."

Some one whispered: "Now I see why women generally live longer than men. They talk more."

S.S.S. CURES CHRONIC ULCERS

Any chronic ulcer shows an unhealthy and impure condition of the blood. It is a diseased condition of the flesh at that particular spot, caused and kept inflamed and irritated by a continual discharge into it, of unhealthy matter from the circulation. No treatment can have any curative effect except a medicine which will renovate the blood and entirely remove the cause. Salves, washes, lotions, etc., are sometimes helpful in reducing inflammation, cleansing the ulcer, or perhaps lessening the discharge, but such applications do not reach the blood where the disease germs are located and can never effect a cure. S. S. S. goes down into the circulation, drives out all impurities and morbid matter, and by nourishing the flesh with rich pure blood causes the place to heal naturally and permanently. S. S. S. does not make a surface cure, but by beginning at the bottom, and rebuilding broken-down tissue, and supplying healthful, healing qualities to the blood, causes the place to fill in with new, firm flesh, while it steadily but surely effects a permanent cure. The ulcer can not exist when the blood is pure, and S. S. S. will thoroughly purify the blood. Book on Sores and Ulcers and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

A GOOD ONE ON TWO DEPUTY SHERIFFS

A few nights ago two deputy sheriffs from the eastern part of the county were in town, and being approached by a negro with an offer to sell them a bottle of white mule, they decided to catch the bootlegger right there. They repaired to the place where the negro directed them to go, but he failed to show up. Another one came along, however, and they broached the subject to him. The coon thought he knew where something could be found, and in a few minutes returned with a bottle and the money was passed over. They then told the astonished negro to consider himself under arrest, and headed for the court house. Seeing the fix he was in the prisoner remarked: "Say, boss, they told me that was alcohol, but I don't know whether it is alcohol or water. Maybe you had better see." An examination showed that the bottle contained nothing stronger than Byrd's Mill water. However, the coon was locked up, anyway.

It frequently occurs that juries while finding an accused man guilty of the crime as charged, leave the punishment up to the judge. Somehow this does not look exactly fair. Of course it is a grave responsibility to say how many years a man must serve in prison for a crime, but it is manifestly more equitable for the twelve men to divide this than to shift it all to the shoulders of the judge. Of course it may sometimes occur that the twelve cannot agree among themselves on the proper sentence, but it probably more often occurs that some of them are too ready to dodge the responsibility.

SCHOLASTIC POPULATION OF PONTOTOC COUNTY

SPELLING MATCH BETWEEN AHLOSO AND PECAN

Prof. I. J. Meyers, principal of Ahloso school, was in town this afternoon and informed the News that on Friday evening his school held a spelling match against the Pecan school, which is being taught by Prof. Lawson. The match resulted in a victory for Pecan. Miss Viola Bumgarner being the best individual speller. Another match is scheduled for Pecan school house Wednesday evening. Prof. Meyers strongly favors a field meet being held this spring by the rural schools. As there is nothing whatever in the way of such a meet being held, it is highly probable that a date may be arranged in a short time and the meet pulled off.

CEMENT USERS WILL MEET AT KANSAS CITY

On March 11-16, 1912, the Association will meet in its Eighth Annual Convention, at Kansas City, Mo., which will undoubtedly be the greatest gathering in the history of the cement industry. The First Kansas City Cement Show will be held March 14-21, under the auspices of the Cement Products Exhibition Company.

The Headquarters and Convention will be at the Hotel Baltimore, where each member must go to register and secure information on all matters pertaining to the convention and cement show.

STATEMENT OF OKLAHOMA STATE BANK OF ADA

The statement of the Oklahoma State bank appears in today's issue of the News. From it one gathers the information that this bank has lost none of its old time popularity. Its deposits amount to \$122,000 and loans above \$98,000. This bank has always been most conservatively managed, and to that must be attributed the fact that it ranks as one of the strong institutions of Pontotoc county.

WOMEN WILL VOTE IN PRESIDENTIAL ELECTION

(By Winfield Jones.)

Washington, March 9.—From a million and a half of women will have something to say in choosing the next president. In at least six states the hand that rocks the cradle will also cast the ballot.

In the six states where women will vote next November they constitute somewhat less than one-half of the total voting population. The census report is authority for the statement that men are increasing in this country more rapidly than women, due to the larger number of men immigrants. The excess male population is fixed at 2,000,000. In the Western States men are not so much in the majority, however, as they were in earlier pioneer days. Moreover, it seems to be generally conceded that women register and vote in larger proportion than men. To take the woman's vote, therefore, at approximately half the entire voting population of the six states where the feminine influence is "direct" would not be far wrong.

Estimating Washington's total voting population inclusive of the new woman vote at 450,000, Idaho's at 125,000, Wyoming's at 50,000, Utah's at 150,000, Colorado's at 300,000, and California's at 800,000, we would have an aggregate of nearly two million voters in the six states. Possibly the fairest estimate would fix the quota of women voters at about 1,500,000, a number large enough to be reckoned with in any campaign.

This army of women, despite the fact that the United States is sometimes called slow of persuasion by suffrage enthusiasts includes one-third of the women voters of the world, the other two-thirds being in Australia, Finland, Norway and New Zealand. It is more than the usual presidential plurality. If a million and a half voted solidly they might decide the presidency.

The women will not vote solidly, any more than men will vote solidly. About the most that can be said as indicative of women's solidarity in politics is that they have a tendency to break away from party lines, to choose the man rather than the party, and that in their politics as in their industrial economies, they follow the biological law under which the female of all species operates as the upbuilding conservator of life. Their political activity has been almost uniformly constructive, and the results of that activity have been almost uniformly reflected in legislation directly related to the welfare of the home and the family—child-labor laws, school laws, and industrial laws that concern women.

The exercise of the voting privilege in 1912 will be no novelty to the women of Wyoming, where they have been voting since 1890, the franchise having been bestowed upon them a year after the organization of the Territory. When the Territory became a state in 1890, women suffrage was written in the constitution. Wyoming women have exactly the same political significance that men have, and according to figures from the state, 90 per cent. of them make the most of it, registering and voting regularly. They often sit as jurors and serve as justices of the peace.

The women of Colorado are not novices at voting in Presidential elections. They were franchised in 1893 so that they have been voting for presidents for nineteen years.

Utah women voted when the state was still a territory. The territory

became a state in 1896, and the right of women to vote was established in the constitution. A woman has once been elected to the senate in Utah, and several have served in the house of representatives.

Idaho women will cast their fifth presidential votes this year, having the franchise since 1896.

Washington women also voted when Washington was a territory. In 1887 woman suffrage was declared unconstitutional, and was not put into the constitution of the new state upon its admission to the union. In 1910, however, it carried the state by a vote of three to one.

California women will be the first in the United States to have an opportunity to vote directly for president. The presidential primary law passed both houses of the California legislature in extra session sometime ago. Six other states, where women do not vote, have passed laws conferring the same privilege upon men voters. There are six American cities, with populations of more than 100,000 each, where women vote for president, congressmen, and all other officials, on the same basis as men. Three of the six are in California, San Francisco leading as the largest.

YOUNG DEMOCRATS WILL MEET THIS EVENING

To the Young Democrats of Ada and Vicinity:

At the recent democratic convention in Oklahoma City a Young Men's Statewide Democratic Club was organized by young democrats representing practically every county in the state, to work for the welfare of the democratic party.

It is not the purpose of this club to support any man or any faction of the party, but simply to work for the best interests of the party as a whole.

Under the direction of the state organization, clubs of young democrats over the age of 16 are to be organized, the club of each county to be in charge of a president, elected by the members of such county.

Following the plan as outlined by the executive committee a meeting has been arranged to be held in the court house at Ada Saturday night, March 9, to organize the Pontotoc County club. At this meeting the county president will be named and active work of organizing the county will be planned. Every young democrat in the county who has the welfare of his party at heart is urgently requested to be present.

Let us go to the state convention in August with the banner club of the Fourth District.

B. M. BOBBITT,
Vice-Pres. Fourth Congressional District.

INTERESTING DISCOVERIES AT OLD POMPEII

Naples, March 9.—Highly interesting discoveries have been made in connection with the excavations in the ruins of Pompeii. A street leading to the Forum, which was closed at both ends by stone pillars for the purpose of excluding carriages, now proves to have been one of the chief thoroughfares of the city. It is lined with shops, the walls of which show inscriptions and marble tablets, which are well preserved. A great quantity of archaeological treasures of great historic value have been found, and the investigators have gathered up a quantity of petrified fruit and meat.

In one shop a large terra cotta kitchen range was discovered, on the top of which rested an oval copper boiler in perfect condition, containing water, which the scientists say has been there since the time of the eruption, nearly 2,000 years ago.

It removes blemishes, freckles, blackheads—it softens, whitens, soothes and smooths the skin—it removes wrinkles—and it beautifies the complexion—it's Gwin's Favorite Cream—25c and 50c—Gwin & Mays, 286-51d
